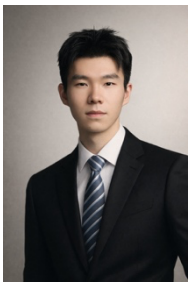
Yitao Zhang



E-mail: yitao_zhang1999@outlook.com

Tel: 15623109512

Date of birth: 01-1999

Education

Bachelor degree of Economics (Financial engineering) 09.2017 — 06.2021

Average score: 82.2/100 (3.2/4) *Hubei University of Economics*

Master degree of Finance 09.2023 — 06.2026

Average score: (3.62/4, Top 5%) *Guizhou University*

Main courses: Financial Theory and Policy (93); Derivative Financial Instruments (90); Operation and Management of Financial Institutions (95); Financial Data Analysis (94); Quantitative Investment (93); Behavioral Finance (93)

CET6: 514

Publications

---

(1) Longyue Liang, Weiwei Yang, **Yitao Zhang*** (2025). Firm-level perception of climate policy uncertainty and resilience: Textual evidence from China's A-share market. ***APPLIED ECONOMICS*** (SSCI Q2) (***Corresponding author, with the supervisor as the first author***)

(2) Debin Xiong, Yulin Huang*, **Yitao Zhang** (2025). The Governance Effectiveness of State-Owned Enterprises under the Guidance of "Two Unswerving Principles": A Quasi-Natural Experiment Based on the Three-Year Action Plan for SOE Reform. ***Modern Management Science*** (a peer-reviewed academic journal indexed by Peking University Core).

Papers Under Review/ Submitted

---

(1) Xuanye Cai, Longyue Liang*, Jian Yu, **Yitao Zhang**. Climate Policy Uncertainty and Firm-level Carbon Reduction Strategies: Evidence from Double Debiased Machine Learning in China. ***China & World Economy*** (SSCI Q1) (***Under Review, co-corresponding author, with the supervisor as the first corresponding author***)

Working Papers

---

(1) Longyue Liang, **Yitao Zhang***. How does AI impact firm resilience? Based on the perspective of human resources (***Corresponding author, with the supervisor as the first author***)

(2) Longyue Liang, **Yitao Zhang**, Xuanye Cai*, Jian Yu. Climate policy uncertainty and enterprise supply chain resilience (***With the supervisor as the first author***)

(3) Longyue Liang, Weiwei Yang, **Yitao Zhang***. Perception of climate policy uncertainty and firm environmental tax burden (***Corresponding author, with the supervisor as the first author***)

(4) Longyue Liang, Leyi Bao*, Yitao Zhang. The Impact of Corporate ESG Performance on Financing Constraints under External Supervision. (***With the supervisor as the first author***)

Academic Conference Experience

---

(1) Participated in the 2025 Summer School on "Artificial Intelligence and Humanistic Economics" organized by the School of Economics and Management, University of Chinese Academy of Sciences (2025.7).

(2) Participated in the 13th China Investment Annual Conference and Seminar on Investment Discipline Development, featuring the Inaugural Asset Management Summit Forum. (2025.5)

(3) Paper has been selected for the 2025 International Conference on Digital Intelligence-Empowered New-Quality Productivity Development in Cultural Tourism. (2025.3)

(4) Paper has been selected for the 2023 Inaugural International Annual Conference on Frontiers and Innovations in Management. (2023.12)

(5) Participated in the "Tsinghua big data and causal inference seminar" Graduate School of Tsinghua interdisciplinary research capability improvement program in the autumn of 2023 hold by Laboratory of Computational Social Science and State Governance, Tsinghua University. (2023.11)

(6) Participated in the 2023 academic annual meeting of Guizhou Institute of quantitative economics and Guizhou Digital Economy Development Forum. (2023.11)

Research Projects Experience

---

(1) **Guizhou Theoretical Innovation Project: Research on Developing Silver Economy in Guizhou** (2025). As one of the *project participants*, contributed to proposal drafting by providing critical insights into research rationale, conducting systematic literature reviews, and designing technical roadmaps. Participate in the on-site report and defense of the project proposal expert group.

(2) **Guizhou Philosophy & Social Sciences Planning Project: Machine Learning-Based ESG Investment Effectiveness Study** (2024). Assisted in technical feasibility analysis leveraging existing team research outputs during proposal preparation.
• Two peer-reviewed papers were supported by this project.

(3) **Guizhou Science & Technology Department Fundamental Project: Deep Learning-Driven Personal Credit Risk Assessment** (2024). Assisted in the preparation of monographs, and participated in the model construction, empirical test and content writing of some chapters. Mainly responsible for the content consolidation, formula calibration and literature revision of the whole book.
• Consulted the literature and theoretically analyzed the credibility of graph convolution neural network (GCN) in personal credit risk prediction.
• Built a sample credit similarity network based on the existing data of the team. Made customer similarity default prediction based on the GCN model built by the team.

(4) **Guizhou Finance Society Project: Digital-Real Economy Integration Mechanisms** (2023). As one of the *project participants*, assisted in the measurement and empirical test of the main indicators of the project, wrote papers and participated in the closing work.
• Constructed the provincial digital economy development index and conducted coupling coordination analysis, dynamic evolution and development analysis. Provided data basis for team empirical work.
• Constructed firm-level digitalization metrics through NLP-driven text analysis, conducted causal inference and empirical analysis based on double machine learning (DML) method. Provided theoretical and empirical evidence for the team's research on the development of digital economy at the firm level.
• Wrote a paper as a result of the project and won the second prize of the outstanding research achievement of the 2023 research project of the Guizhou Institute of Finance.

(5) **Hubei Philosophy & Social Sciences Project: FinTech-Driven High-Quality Development Strategies** (2019). As one of the *project participants*, assisted in data collection and data collation in the early stage of the project. Mainly responsible for data cleaning, matching, data visualization and writing data analysis report.

• Read literature and summarized the development process of financial technology. Wrote a report of over 15 pages, defined the concept of financial technology for the team and provided sufficient information on the development history of financial technology.

• Statistically analyzed the global development status of financial technology, including its stock and incremental scale, as well as country distribution. Organized the development history of key global financial technology companies, conducted qualitative and quantitative ranking analysis, and wrote a data analysis report of more than 20 pages. Laid the foundation for the team's subsequent research.
